

Bradney's "Calibrated" Chain is now 25% Stronger than Grade 30

We have been making chains for over 120 years and we would like to think we know what we are doing. For many years we have supplied chain as Grade 30 but we have always known it was **Grade 40** in strength.

We thought it was about time we passed this on to our customers & potential customers.

Look at the table below and compare. You will also see our chain is stronger than DIN766 chain. If you don't already buy from us, ask your current supplier what his chain is tested to? Ask them what the minimum break is? Ask if the chain comes with a test certificate?

If you are interested then please email sales@bradneychain.co.uk if you have any requirements, or alternatively, call **01384 636 233**. Let us know if you have received this email by quoting ref CM0112 and our sales team will apply an additional discount to your enquiry.

Remember to specify your windlass make and gypsy reference so we can match a chain from our extensive range of calibrated chains. All our chains are tested and come with a test certificate.

CHAIN DIA (MM)	TYPICAL G30		BRADNEY G40		DIN 766	
	Proof Load kN	Min Break kN	Proof Load kN	Min Break kN	Proof Load kN	Min Break kN
7	9.7	24.4	12.2	30.8	16	25
8	12.7	31.8	15.9	40.4	20	32
9.5 / 10	17.9	44.8	22.4	56.8	32	50
11	24	60	30	76.2	40	63
12	28.6	71.4	35.7	90.6
